

12V

Professional autonomous starter with integrated charger for starting all vehicles equipped with 12 V batteries.

A high-performance stand-alone starter

Equipped with a «**high performance**» lead battery (in start-up: 830A at 1V/c and 3100A at battery peak), the Gyspack PRO 900 is ideal for starting up light vehicles, vans, tractors and trucks.

Ideal for onsite interventions

- ✓ With its small size and 15kg weight, it is **easily transportable on site and without effort.**
- ✓ **1.80 m of cables** for optimal user comfort.

For safe use

- ✓ Protection against polarities inversion thanks to an audible warning device and an indicator light.
- ✓ Equipped with a fuse to protect your carries overvoltages or short circuits and avoid sparks when connecting the clamps.
- ✓ Equipped with a 300 A fuse protecting the system by case of misuse.

Complete unsupervised charging

- ✓ Thanks to its integrated automatic charger (6 A - curve 7-step intelligent charging), the Gyspack PRO 900 recharges 100% from the mains, unattended, even when permanently connected.
- ✓ Visualization of the state of charge thanks to three LEDs.

Memory backup function

- ✓ 1 cigarette lighter socket for holding or saving vehicle memories (15 A fuse) when changing batteries.

A protected cover

- ✓ The GYSPACK PRO 900 is equipped with corner pads. They protect the cover from impacts when working in demanding environments (on site or in the workshop).

After each use

Intelligent charging curve: 7 steps

- 100% automatic charging
- Extends the life and performance of the internal battery
